

## IS ANYONE EATING FROM YOUR TREE ?

*--How to discover your call and know when it is time to start moving towards it.*

Your call is often a progressive discovery, it is not a job description or something you step into from one day to the next. It is a progressive discovery of the gifts that are in you and how you can bless people around you.

Is anyone eating from your tree ? Are you producing any fruit that anyone want ? If noone is eating from your tree, then your roots need to grow deeper until you produce some good fruit.

We are the ones who establish the depth of our relationship with God and as we grow in intimacy with Him, He will help us to bear fruit and establish the breadth of our influence. Your call is your influence on the world around you, and it depends on the deepness of your roots.

So take charge of your roots and let God be in charge of the fruits and the breadth of your influence. You may go through different seasons of opportunities but remember we are living to be a blessing to people wherever we are, that is our call. You may discover a more specific call as the years go by, but we are all called now, right this minute, to be a blessing to those around us, to live to give, to live to bless and to lift people up, that is our call.
